A winning combination of outstanding cross-media opportunities limited only by the imagination

2. www.ausauto.com

The Internet has changed the way we do business resulting in a huge range of choice and unlimited demand for information. A strong cross-media presence is no longer just an option but an essential part of all information and marketing programs.

Motor Equipment News, Australia's leading independent auto aftersales magazine, that covers all sectors of the industry, is part of an exciting package of products that opens up a whole new world of opportunity within the professional auto repair industry and beyond.

The publication's internet site www.ausauto.com has been completely revamped to include 1000s of pages of information of vital importance to your existing customers and potential new clients and we have added an electronic newsletter to fit between the printed issues of Motor Equipment News.

As part of the cross promotional environment, each issue of Motor Equipment News will feature a competition with a range of prizes culminating in an overseas 'Trip for Two' in which MEN readers can only enter the competition by visiting www.ausauto.com

Every issue will also feature an advertisement and/or advertorial outlining the special features such as video presentations, promotions, etc., that are only available at www.ausauto.com

Then there's The Blog, free employment and training courses sector, an Exchange & Mart plus links, links and more links not to mention the Products & Services Directory and the most comprehensive list of automotive industry exhibitions and events anywhere on the web.

And to top it all off there's AutoEquip08 Expo, the major showcase for new and innovative products and the only major auto trade event to be held in Australia during 2008.

The decision to 'guide' Motor Equipment News away from 'heavy' specialist technical information towards a softer 'lifestyle-type' content and position the publication somewhere between a trade magazine and *Wheels* has been a big success.

For the first time in more than a decade paid subscriptions have increased (in a market in which the number of professional auto repair businesses is actually decreasing) high-end brand advertisers have increased their annual spend and companies such as Ford, Panasonic and Shell have used the medium for the first time.

Further value will be added by attracting a new audience of 'enthusiasts', the sort of people that really care about their motor vehicles, including:

The Semi-Professional who has a passion for cars and is actively involved in its performance and appearance or in directing a specialist auto technician to carry out work on the vehicle;

The Classic Car and Historic Racing Enthusiast, one of the fastest growing segments with a wide age bracket and a high-end demographic;

The Performance Sector, the young 'add-on' segment that keeps its hands as clean as its cars but spends like there's no tomorrow.

All of which means you can now purchase a package that will deliver a greatly expanded, yet still tightly targeted market, with literally hundreds of combinations to suit every budget.
